Term / Abbreviation	Definition
AWOL	Autowork Online
URL	Clickable link to be used to access a specific web page

Overview

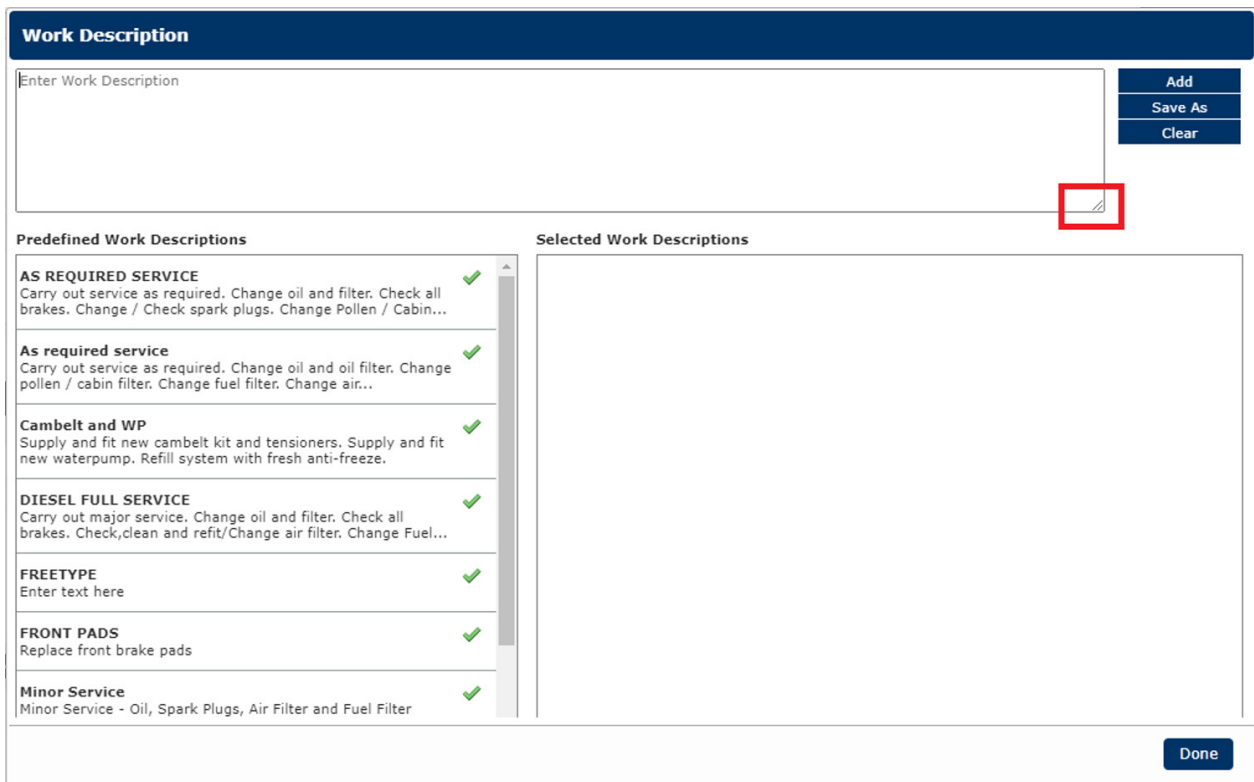

AWOL has had a greater focus on bug fixes and customer requests for the r194 release.

Below some of these requests will be expanded upon, along with a list of various bugs that were fixed and other miscellaneous items that were looked at.

Customer Requests

Description textbox resizing

Pop-up textboxes will now be able to be resized as the user wants:

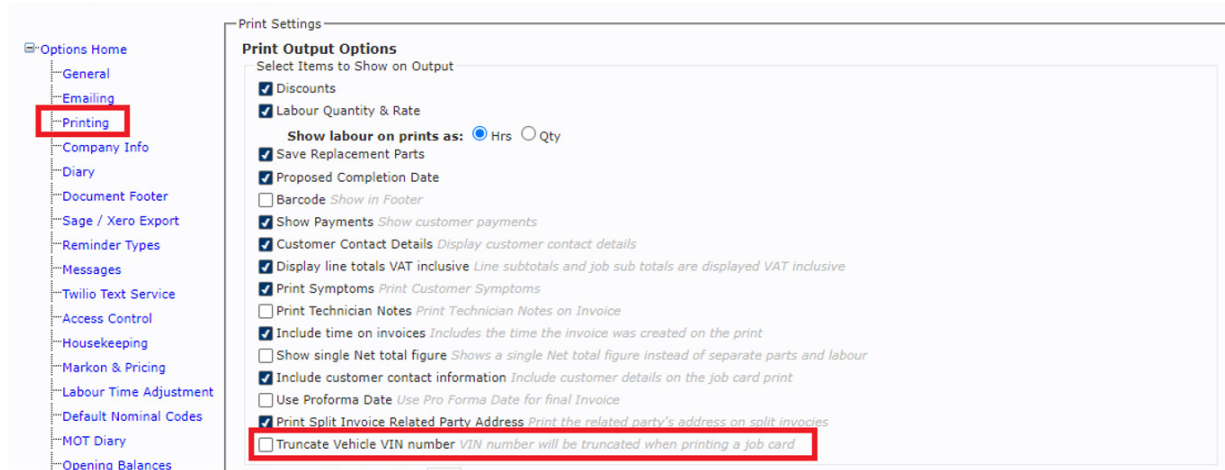

The screenshot shows a 'Work Description' pop-up window. At the top, there is a dark blue header with the title 'Work Description'. Below the header is a large text input field with the placeholder text 'Enter Work Description'. To the right of the input field are three buttons: 'Add', 'Save As', and 'Clear'. A red square highlights a small handle in the bottom right corner of the input field, indicating it can be resized. Below the input field, there are two columns: 'Predefined Work Descriptions' and 'Selected Work Descriptions'. The 'Predefined Work Descriptions' column contains a list of service items, each with a green checkmark icon to its right. The 'Selected Work Descriptions' column is currently empty. At the bottom right of the window is a 'Done' button.

This will apply to various pop-ups like: Work description, advisory notes and symptoms.

Option to truncate VIN numbers on Job Card printouts

Users will have the option to now truncate VIN numbers on Job Card printouts.

In the User options -> Printing section, a new tickbox is available that, when ticked, will truncate the vehicle VIN number on the Job Card printout.

Bugs / Miscellaneous Items

The following bugs / miscellaneous have been addressed within r194

Ref nr	Bug / Defect description
143242	Payment Sense timeout issue
