General Updates

The r196 release for AutoWork Online is mostly focused around updating and putting new backend structures in place that will allow for more exciting features to be completed in future releases.

There is also a load of bugs and miscellaneous items that were addressed. Notable item includes:

TeamView settings always available

Within TeamView, the settings menu was only available to Managers before. A change has been made so that technicians also have access to the settings menu:

Within the settings menu, each Technician will be able to toggle the prompt for notes on Health check failures and advisories (Red and Amber results)

Settings

Prompt for notes on VHC Failures and Advisories
(red and amber results)

Any changes made, will only apply to that specific technician and will not be applied globally.
